FINAL REPORT

KANE COUNTY WATER WELL DATABASE

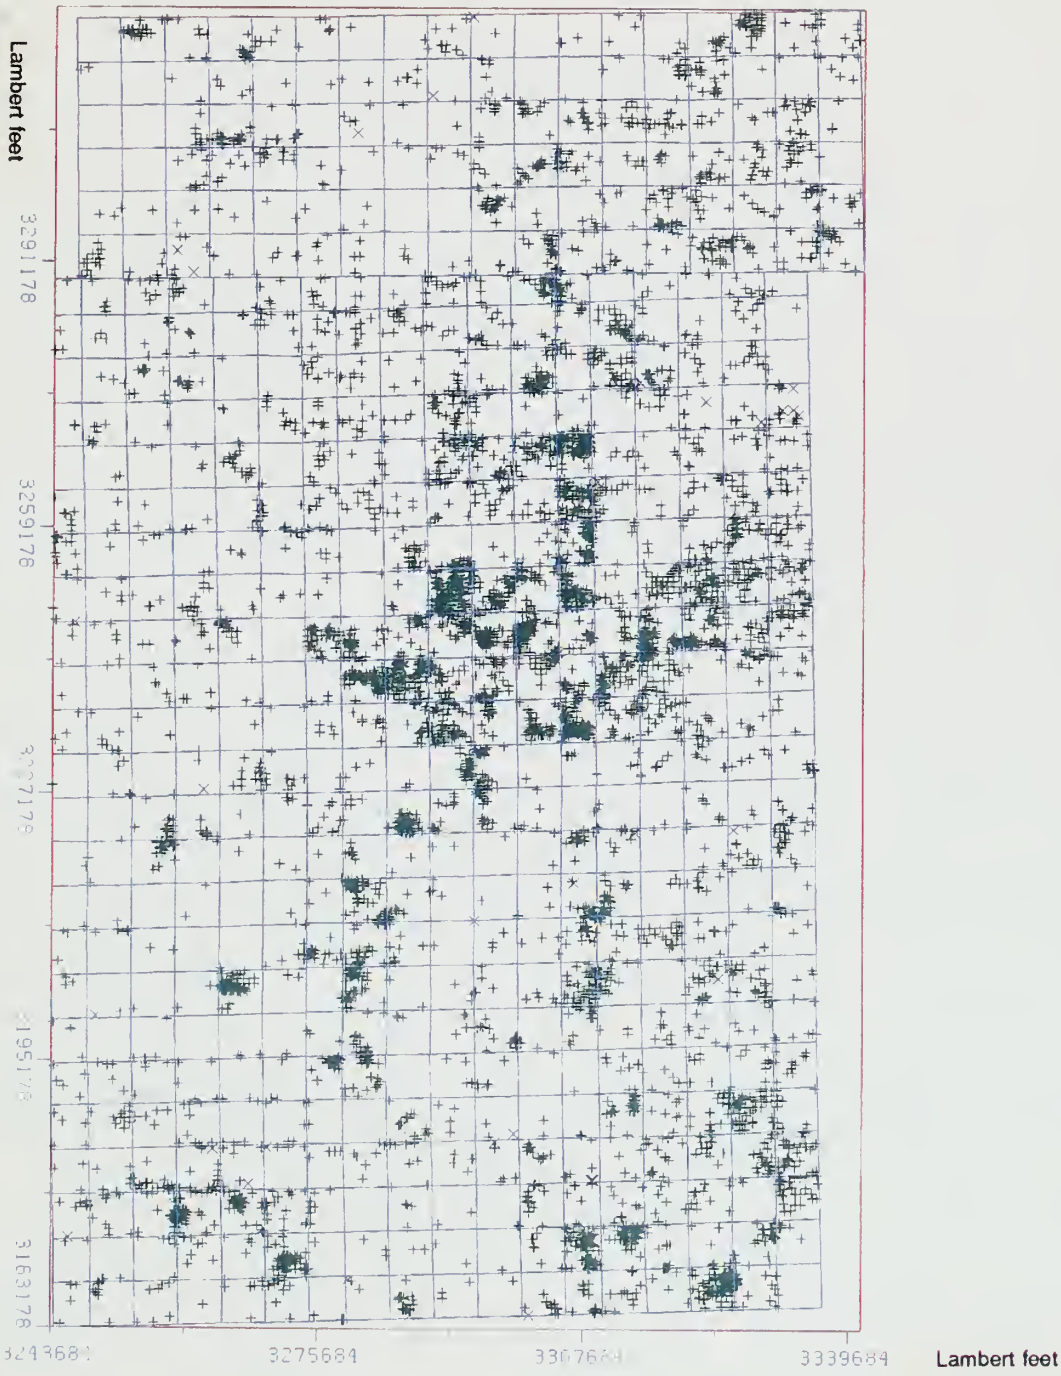
As a result of the work to site the U.S. Department of Energy Superconducting Super Collider (SSC) in Illinois, the Illinois State Geological Survey (ISGS) and the Illinois State Water Survey (ISWS) participated in a joint effort to create a database of water wells in Kane County. This database has 7,846 private and public well records from pre-1900 through 1987 and represents the combination of records from both of the Surveys. This Open File report reflects the information contained in those records.

Appendix A is a set of 15 maps, one for each township, showing the well locations. Water wells are indicated with a "+" symbol. Although principally a listing of water well locations and information, several foundation or bridge borings are also included and are indicated on the maps by an "X" symbol. However, this database does not represent a complete listing for those type of data. **Appendix B** is a printout of the database which is available in digital form (floppy disks available) from the Illinois State Geological Survey.

The information included within the file is a listing of the wells and some borings for which records exist at the Illinois State Geological Survey and/or Illinois State Water Survey. The listing does not necessarily represent all well records. Both ISGS and ISWS continue to update the record as information, both current and historical, are made available. Thus, the database is a dynamic listing and will change through time.

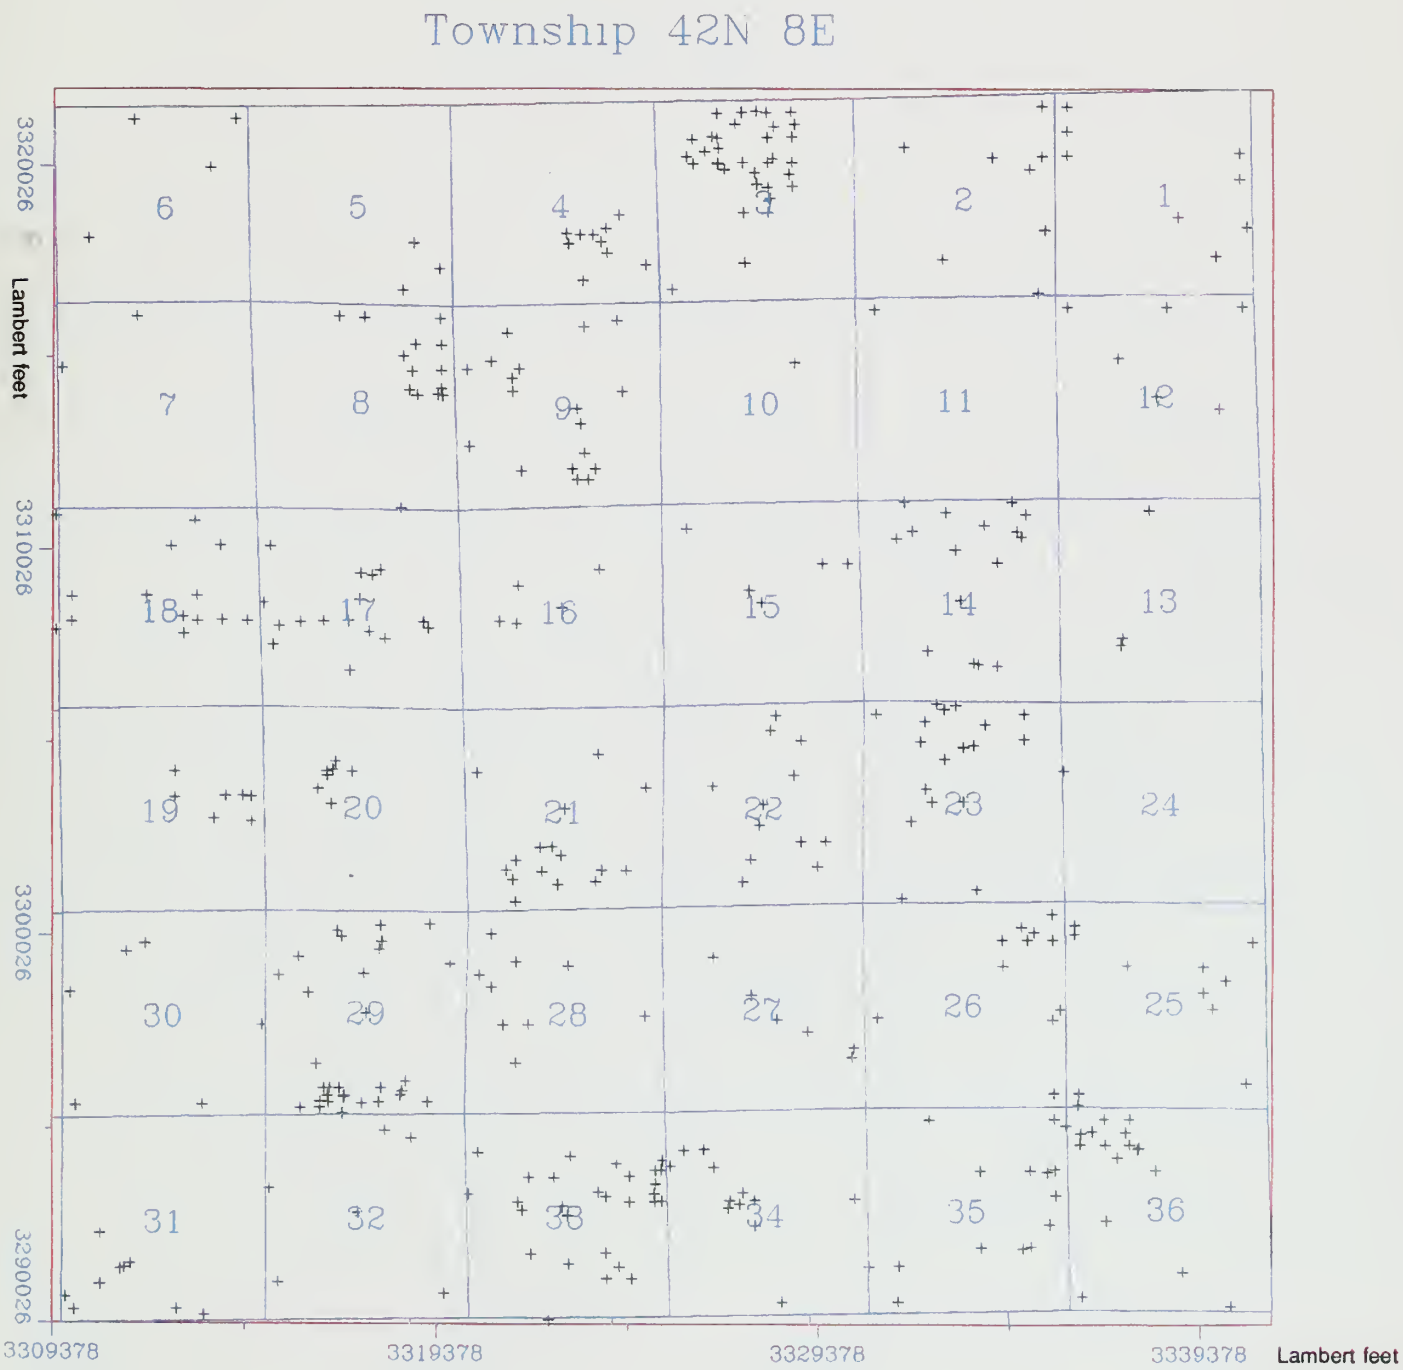
Appendix A

MAP OF KANE COUNTY, ILLINOIS, SHOWING DISTRIBUTION OF WELLS



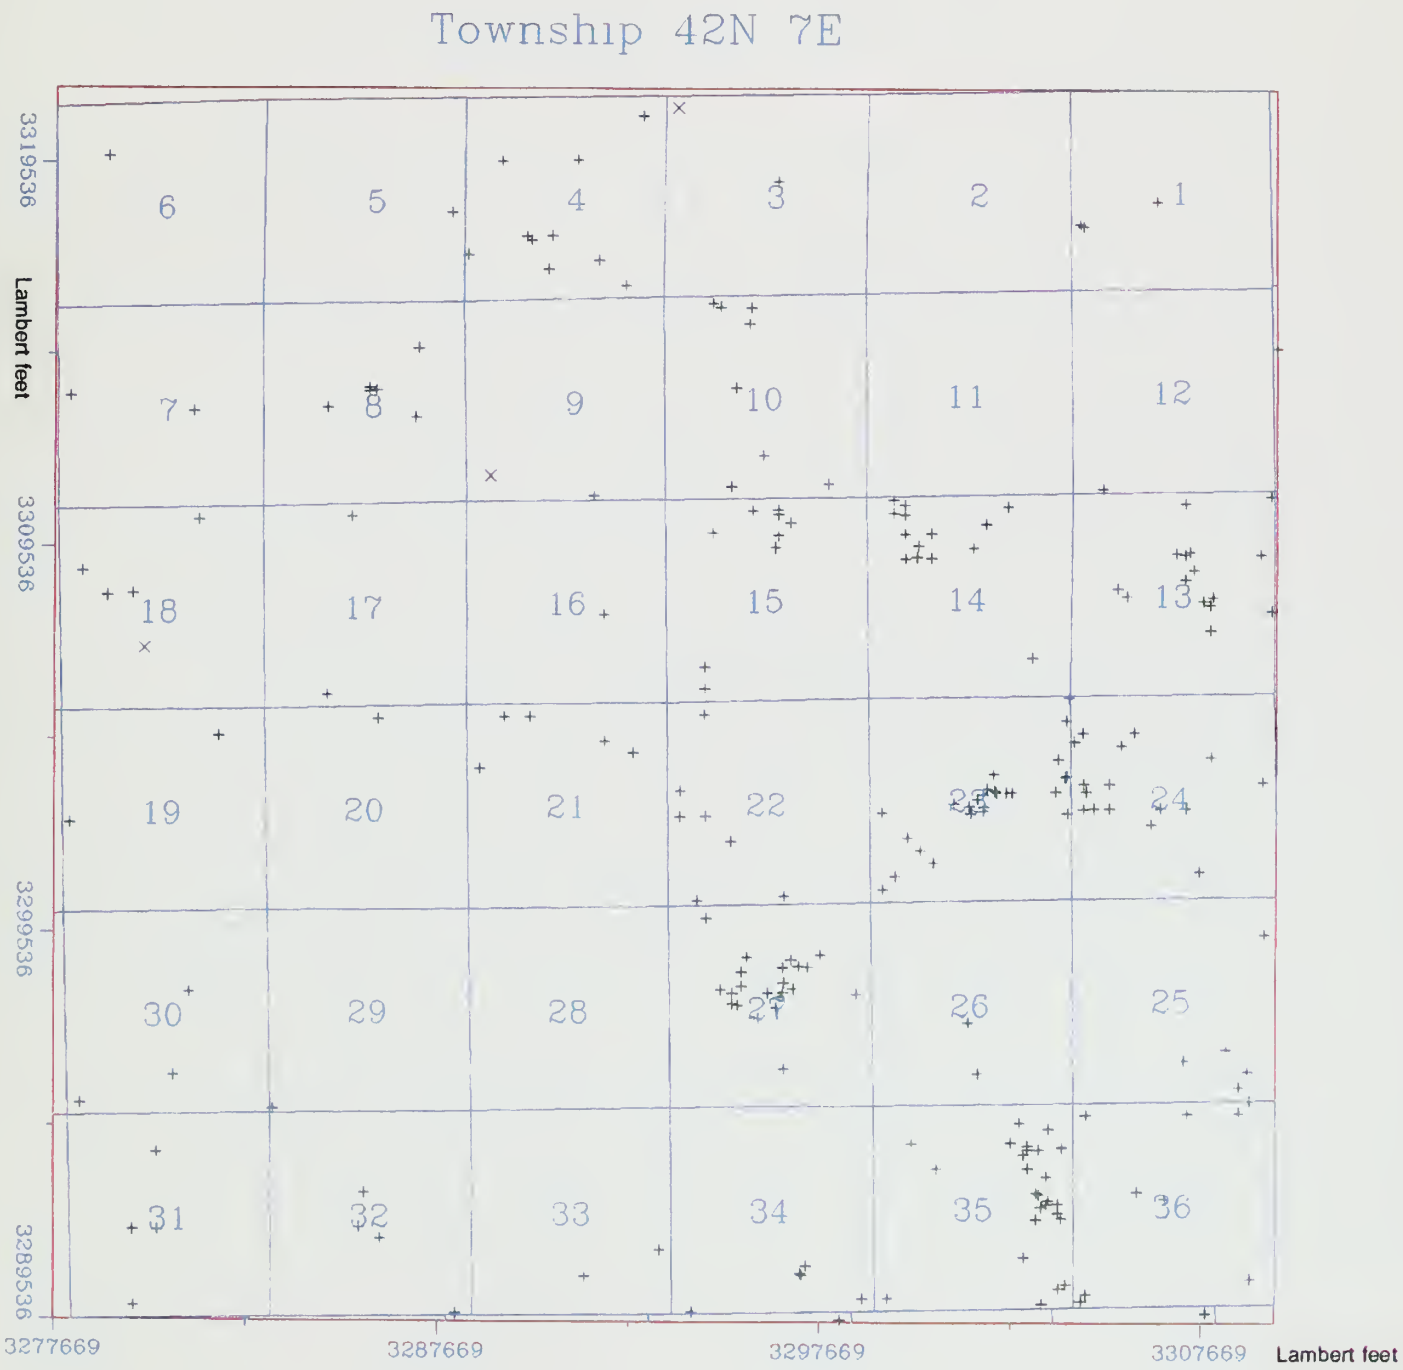
Locations of wells on record at the Illinois State Geological Survey and/or Illinois State Water Survey

KANE COUNTY, ILLINOIS
TOWNSHIP 42N, RANGE 8E



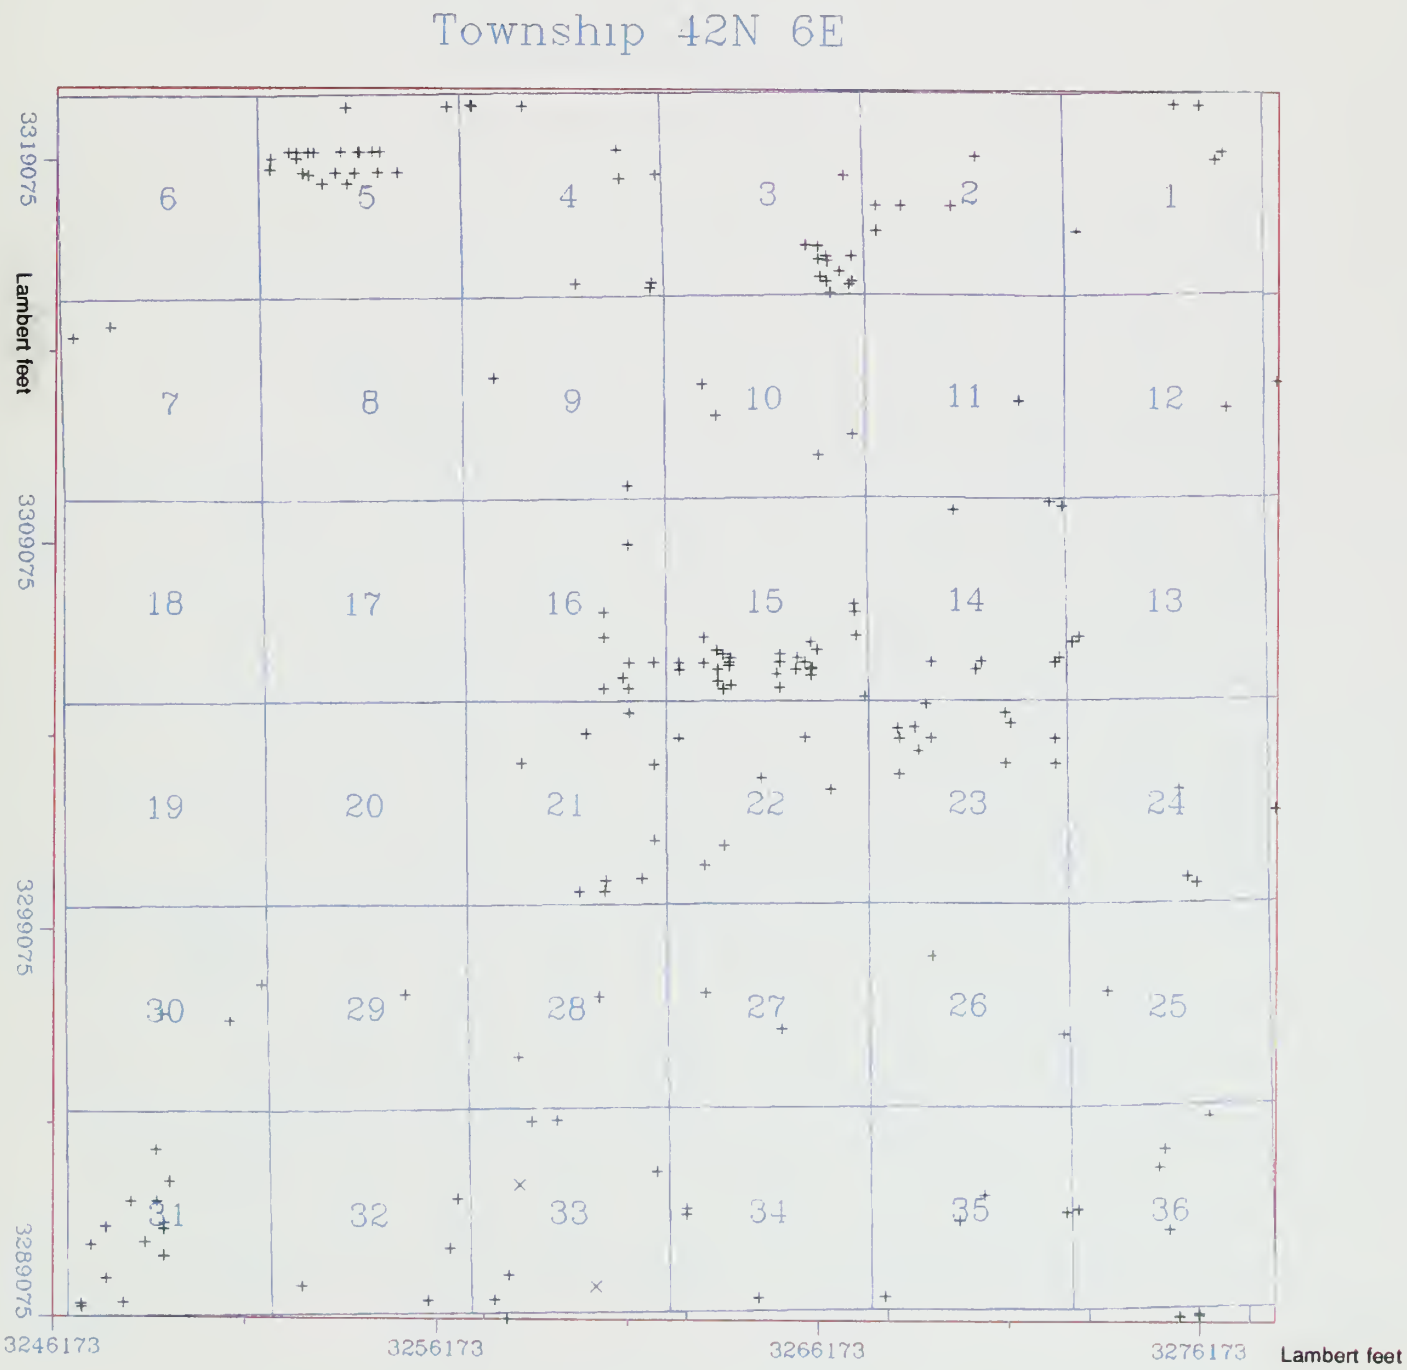
Locations of wells on record at the Illinois State Geological Survey and/or Illinois State Water Survey

KANE COUNTY, ILLINOIS
TOWNSHIP 42N, RANGE 7E



Locations of wells on record at the Illinois State Geological Survey and/or Illinois State Water Survey

KANE COUNTY, ILLINOIS
TOWNSHIP 42N, RANGE 6E



Locations of wells on record at the Illinois State Geological Survey and/or Illinois State Water Survey

KANE COUNTY, ILLINOIS

Locations of wells on record at the Illinois State Geological Survey and/or Illinois State Water Survey

KANE COUNTY, ILLINOIS
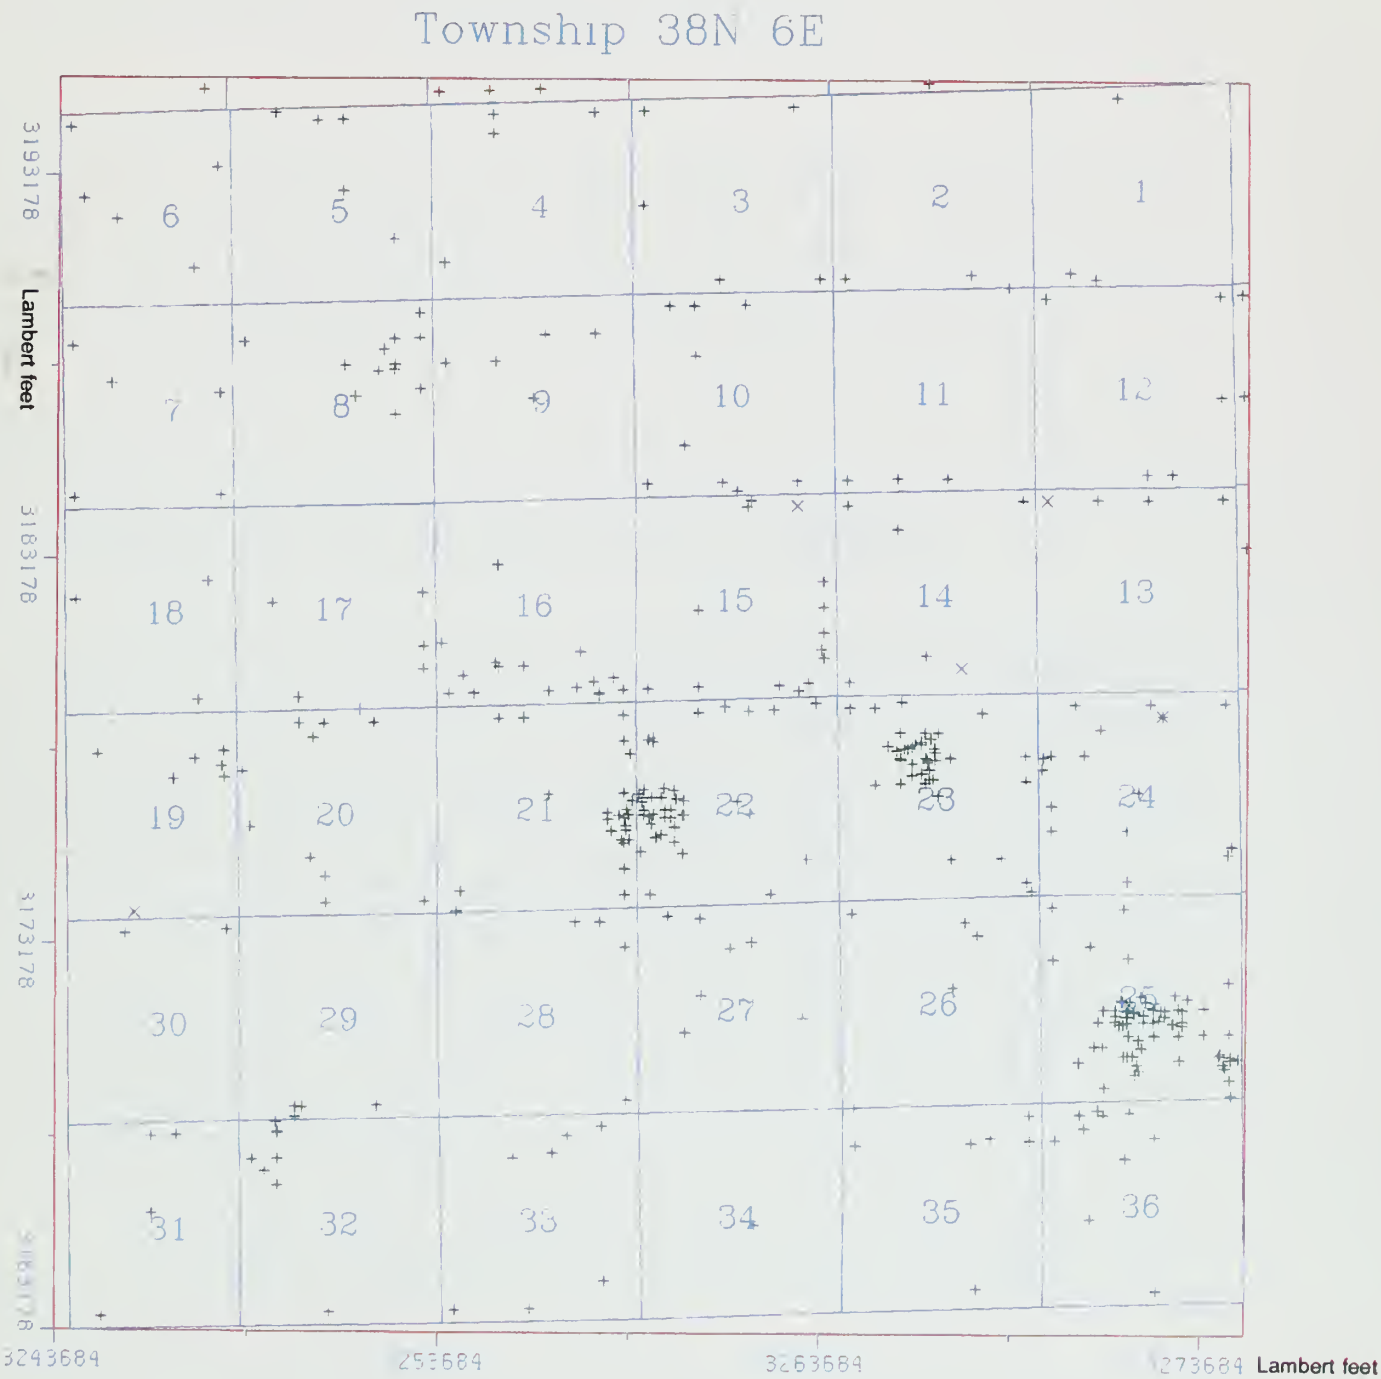
TOWNSHIP 38N, RANGE 6E



Locations of wells on record at the Illinois State Geological Survey and/or Illinois State Water Survey

APPENDIX B

Appendix B is a printout of the well database on file both in printed and digital form at the Illinois State Geological Survey. The printout is arranged in location order by section, township, and range. Each well is listed as a two-line entry. The format is as follows:

Line 1: Unique ISGS ID, permit number, permit/drilled date, section-township-range, N/S and E/W footages, reference corner, quarters, and depth.

Line 2: Owner name, driller name, Lambert X and Y coordinates.

Example.

```
120892748800 130451 03/27/87 34-38N-08E  205S  165E NWc SW NE NE  00120
Ward, Larry                  Pitz, John W.                   3324736 3170097
```

On the first line of the well record shown in the above example, the ISGS ID# is 12089274880, the permit number is 130451, and the permit/drilled date is 27 March 1987. The well is located in Township 38N, Range 8E, Section 34, with a south footage of 205 and an east footage of 165. The reference corner is the northwest corner, and the well is located in the SW quarter of the NE quarter of the NE quarter of Section 34. Total well depth is 120 feet. The second line gives the owner's name (Larry Ward), the driller's name (John W. Pitz), and the coordinate of the well in the Lambert coordinate system (x-coordinate = 3324736 feet, y coordinate = 3170097 feet).

The digital well data on file at ISGS in the same format as the printout. For old wells (pre-1970), often the only date available was the year or month/year drilled. In these cases, the first day of the month or 01-JAN was used with the correct year so that the database could be loaded. For example, a well with the date of 1937 will have the date 01-JAN-37.
